## THE TIDE HAS TURNED

It is now said that when the calculation has been completed, the center of population, which ten years ago was Columbus, Indiana, will have moved east and south.

When the first census was taken, in 1790, the center of population was found to be twenty-three miles east of Baltimore. It has moved westward steadily, and in 1900 was twenty-five miles west of Columbus, Ind., a distance of 505 miles from the starting point. The longest move taken in any decade was eighty-one miles, from Parkersburg, W. Va., to Chillicothe, Ohio, from 1850 to 1860. The farthest south the center has reached was a point sixteen miles north of Woodstock, Va., attained in 1820, when the country had a population of 4,500,000. The heavy gains in population made by the big cities more than offset those made west of the imaginary line in the Hoosier state.

## GREATEST LEAD PRODUCER

IN THE UNITED STATES  
Eighty million dollars' worth of lead and silver has been taken from Warden Hill in the Coeur d'Alene district of northern Idaho since the beginning of systematic development work, according to Stanley A. Eaton, manager of the Bunker Hill and Sullivan mine. The gross output of the district, from 1883 to date is estimated at more than \$210,000,000, with net profits of between \$41,000,000 and \$42,000,000. The district ranks first in the United States in the output of lead, the Missouri-Kansas belt being second, Utah third and Colorado fourth.

"The only discouraging feature of the mining situation at present is the depression in the lead market," Mr. Eaton said, "and this is due solely to the uncertainty about the tariff. Much of the lead now being produced in the United States is mined at a small profit. This is especially true of the Missouri mines. It is out of question for American lead mines to compete with those of Spain, which produce a tonnage equal to the United States with little or no consumption on account of the poverty of the people."

"We are not afraid of competition with the Canadian mines. The conditions under which lead properties are operated in the Dominion are similar to our own, and there is small objection to reciprocity with Canada in lead products."

"But for the tariff uncertainty the lead market would be in a much stronger position than that which obtains for copper, principally because no large lead producers have been developed in the United States for years, while enormous deposits of copper ore, the product of which can be marketed profitably in New York as low as eight cents a pound, have been opened up recently."

## NOTICE OF FORFEITURE

To the heirs, executors, administrator, assigns, or other people claiming an interest in the estate of O. M. Barnes, deceased.

You are hereby notified that I have expended the sum of Four hundred dollars (\$400.00) in labor and improvements upon what are known as the United Verdi and Homestake mining claims, situated on Winnemucca mountain, in the Winnemucca mining district; the above mentioned Four hundred dollars (\$400.00) being the amount required to hold the said claims for the years 1909 and 1910 and expenses for working said claims.

Therefore, you are indebted to me in the following amounts: As one-third owner of the United Verdi mining claim, in the sum of Sixty-six and two-thirds dollars (\$66.66 2-3), and as one-half owner in the Homestake claim, in the sum of One hundred dollars (\$100.00). And if within 90 days after this notice by publication you fail to contribute your proportion of such expenditure and amount due on said assessment work, as co-owner of a one-third interest in the United Verdi and a one-half interest in the Homestake mining claims, or a total of One hundred, sixty-six and two-thirds dollars (\$166.66 2-3) your interest in said mining claims will become the property of the subscriber.

DAVID PAYNE,  
Dated at Winnemucca, Nevada, De-  
cember 24, 1910. Dec. 24-3m.
